

THINMANAGER FEATURES

TM Ready Thin Client Terminal Servers ICA Terminal status on/off Failover	VER 2.3
Configuration Wizards Redundant ThinManager Tree connected clients under server ThinManager Configuration Import and Export Instant Failover Share Keyboard & Mouse	VER 2.4
Support for RDP (server 2003) SmartSession MultiSession AppLink Shadowing Terminal Services Administration Server Grouping Support for USB keyboard and mouse Support for local flash storage devices (Jump Drives) Find RDP Serial Port Redirection Module Screen Saver Module Key Block Module ThinManager Security Groups	VER 2.5
WinTMC SmartSession Queuing MultiCast Terminal Server Properties Graphs SmartSession Rankings Remote Connection Improved Touch Screen Calibration Browse Button Time Zone Redirection Module	VER 2.6
Clear Terminal ID Button Disable a Terminal Server Dynamic ThinManager Synchronization Event Logging Historical Logging Multilevel Groups in Tree Screen Edge Group Selector Send Message to a Terminal Shadow Function Terminal Effects Terminal Scheduler and User Scheduler Terminal Server Group Selector TermSecure TermSecure User Profiles in Tree Improved - Faster Boot Time Improved - Inheritance of Terminal Group Properties Improved - Restart The Terminal Without Having To Reboot Improved - ThinManager Tree Pane Editing Improved - Touch Screen Calibration	VER 3.0
MultiMonitor HTML reports Mirrored Redundancy TermMon.Lock ActiveX Terminal Server Group Settings Touch Screen Calibration for MultiMonitor	VER 3.1
Support for RDP (server 2003) MultiSession Licensing Enhanced - Find Function Enhanced - Monitor Status Lights Enhanced - Auto-Synchronization Override Full Screen Shadow Configurable Shadow Port Configurable Firmware Packet Size Connect-to-Console Enhanced AppLink Folder Path TermSecure Support for WinTMC Session Tiling Renamed - Application Groups Terminal-to-Terminal Shadowing	VER 3.2
Command Line Options Detail Pane Printing Application Group Summary Tab MultiMonitor WinTMC Multicast/Unicast Function Enhanced - ThinManager Server Security Groups Interface Support for server 2003 R2	VER 3.3
IP Camera Support Centralized Master License Instant Failover, MultiSession, Redundant Ethernet, Share Keyboard & Mouse, and SmartSession now included in the product Keyboard Configuration Module Key Block Single Key Module Terminal-to-Terminal Shadowing IP Camera Support in TermMon ActiveX	VER 4.0
64-bit version Support Virtualization Support Workstation Support	VER 4.1
PXE Server ThinManager Mobile iOS XLI Licensing MultiMonitor, TermSecure, and WinTMC The XLI license also allows the PXE booting of common thin clients	VER 5.0
Firmware Packages Terminal Description Field USB to VGA MultiMonitor Support ITMC iPad Block Mouse Button Functions 6.0 is all XLI Licensing	VER 6.0
Relevance Mobile Platform Updated User Interface Reorganized Tree Structure Enhanced Shadow Control	VER 7.0
Biometric Security Support Support for Windows Active Directory Support for Android Mobile Devices H.264 Video Compression Secure and Robust Database Encryption	VER 8.0
Support for 4k monitors Virtual Screens Session scaling SMS messaging Support for new biometric hardware Support for VNC connections Authenticated Email Firewall compatible TFTP	VER 9.0
Authentication Pass Through Tiling, Virtual Screen and Camera for WinTMC VNC Support for PanelView 5000 Separate ActiveX Events Support for Wearables like the HoloLens PIN Authentication Password Caching Mobile Device as a Beacon Additional Location Resolvers	VER 10.0
Enhanced Flexible Touchscreen Navigation FactoryTalk Common Installer FactoryTalk View SE Licensing Benefits FactoryTalk Activation Display Client Groups MultiMonitor Enhancements UEFI Support Support for Non-English Keyboards USB Badge Reader Module TermMon .NET Component	VER 11.0
Freeform MultiMonitor Tiling, IP Camera support for aTMC Additional Fingerprint Reader Support Nymband Authentication Support DDC Support for Brightness Control Configuration Heartbeat for ActiveX Control Additional PIN controls	
Inherited Display Clients Support for Non-English Strings and Terminal Commands Filter Display Clients during selection Add Active RDS Server Property to TermMon Custom Hotkeys based on terminal ASEM ES300 Support Updated RDP Module Docker Container Web Browser Display Client Support for Citrix Storefront Portrait Mode Second WVS200 Monitor Resolution Support Device/Area/Location dependent PIN Authentication Logging for administrative changes Override authentication method at terminal/location Association of unknown badge at terminal	VER 12.0
Docker Container Web Browser Display Client - Terminal Hosted Allow User to Change the Database Password in UI Relevance User Manual Unlock SysLog Compatible Recording Updates to Expired Subscription	
REST API Database Health Check Support for Cookies in Web Browser Containers Sound in containers MSI patch adoption Event Based Content Delivery Canned virtual screen layouts Sound redirection for ITMC, aTMC Custom CA Certificates for Web Browser Containers RA Firewall Utility adoption Secure boot for supported hardware	VER 13.0
Updated UI icon set Signed web-based containers Firmware over HTTPS and stored on SATA SSD eSignature	

THINMANAGER
A ROCKWELL AUTOMATION TECHNOLOGY

VERSION HISTORY

ThinManager® is a content delivery and thin client management platform designed for configuration, deployment and management of industrial applications, users and end-user devices. ThinManager centrally manages your industrial computing assets and securely delivers content to terminals (thin clients, PCs), users (based on role), and/or locations (mobile devices).

ThinManager provides features that allow for a customized end-user experience. Administrators can deliver multiple applications, with customized layouts to any terminal. Content can be easily displayed across multiple monitors and touchscreens or securely delivered to mobile devices, based on the location of the user. ThinManager also supports multiple forms of user authentication.

ThinManager increases security by never storing content on end devices. All terminals managed by ThinManager connect to centralized servers (HMI, MES, CMMS, etc.) and only access content when authenticated by ThinManager. ThinManager-managed terminals can also be replaced in under two minutes, seriously reducing unplanned downtime in your industrial facility.
