

ThinManager®

# FLEX LICENSING

ThinManager FLEX  
licensing includes the  
first year of Platform  
Maintenance.

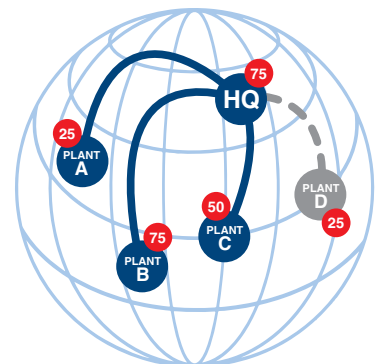

Ideal for multiple facilities.  
No limitations on network.  
Add additional licenses.

**Thinmanager Flex Licensing** allows customers to purchase a pool of licenses to be used across multiple locations.

Deliver ThinManager client connections with pinpoint accuracy and maximum flexibility on an as-needed basis to any of your facilities around the world. ThinManager FLEX licensing is a pool of 100, 250 or 500 ThinManager XLr individual redundant terminal concurrent connection licenses that can be deployed over an unlimited number of ThinServer pairs (primary/backup) at an unlimited number of locations on multiple networks.

**Example:**

- The *HQ Company* has a headquarters, 3 operating facilities and 1 facility under construction.
- They have purchased ThinManager FLEX for 250 licenses.
- Their headquarters and operating facilities currently use 225 licenses.
- They have 25 licenses to use when the new facility is complete.

**More advantages to a FLEX licensing package:**

- Central management of ThinManager client connections.
- Use across multiple facilities.
- No limitations on the number of networks and servers.
- Ability to add additional licenses.
- ThinManager FLEX licensing includes the first year of Platform Maintenance.
- Access to a private ThinManager license server portal for creating and distributing licenses for use.
