

## DNS Configuration

Use the **F1** button on any page of a ThinManager wizard to launch Help for that page.

Visit [www.thinmanager.com/TechNotes/Intro/Manuals.shtml](http://www.thinmanager.com/TechNotes/Intro/Manuals.shtml) to download the full Manual or the ThinManual.

Launch the **Domain Name Server Wizard** by selecting **Manage > DNS Configuration**. This will allow you to define the Domain Name Servers.

*Domain Name Service Wizard - Introduction*

The Domain Name Service Wizard Introduction screen allows the use of a DNS.

**System without a DNS server** - The default setting is for systems without a Domain Name Server.

**System using a DNS server** - This setting allows use of a DNS. Select the **Next** button to launch the **Domain Name Service Configuration** screen.

## Domain Name Server Configuration Page

Domain Name Server Configuration

The **Domain Name Service Configuration** page allows DNS settings to be configured.

**Add DNS Server** button will launch a dialog box that allows a DNS Server to be added to the list.

**Remove DNS Server** button will remove a highlighted DNS server from the list.

**Up** and **Down** arrow keys will change the order of DNS servers used. Highlight a DNS server in the list and select the appropriate arrow.

**Domain** is a field for the DNS domain name.

**Search Domain** will add the contents of the field as a prefix to any DNS searches.

**Read DNS Setting from this computer** will transfer the DNS settings from the current computer into ThinManager.

**Add DNS Server** button launches a **DNS Server** dialog box that allows the IP address of the DNS server to be entered.

## DNS Server Entry Window

*Domain Name Server Configuration - Add DNS Server*

**Name Server** – This field selects a DNS for use in ThinManager when the IP address of a DNS is entered and the **OK** button is selected.

Additional IP addresses can be listed by selecting the **Add DNS Server** button **Domain Name Service Configuration** page again.

Select the **Finish** button when the DNS configuration is done.
