

# **IP Cameras**

Use the F1 button on any page of a ThinManager wizard to launch Help for that page.

Visit <u>www.thinmanager.com/TechNotes4/01\_Intro/Manuals.shtml</u> to download the manual, manual chapters, or the abridged ThinManual.

# Overview

ThinManager 4.0 provides support for IP cameras. Most IP Cameras that conform to the mjpeg (motion jpeg) are supported. Video from the camera can be viewed as an overlay on top of a non Camera Display Client or as part of a Camera Display Client.

This Tech Note covers all aspects of the camera. **Camera Display Servers** and **Clients** are covered in <a href="http://www.thinmanager.com/TechNotes4/04\_Configuration/Camera\_DisplayServer.pdf">http://www.thinmanager.com/TechNotes4/04\_Configuration/Camera\_DisplayServer.pdf</a> and <a href="http://www.thinmanager.com/TechNotes4/04\_Configuration/Camera\_DisplayServer.pdf">http://www.thinmanager.com/TechNotes4/04\_Configuration/Camera\_DisplayServer.pdf</a> and <a href="http://www.thinmanager.com/TechNotes4/04\_Configuration/Camera\_DisplayServer.pdf">http://www.thinmanager.com/TechNotes4/04\_Configuration/Camera\_DisplayServer.pdf</a> and <a href="http://www.thinmanager.com/TechNotes4/04\_Configuration/Camera\_DisplayClient.pdf">http://www.thinmanager.com/TechNotes4/04\_Configuration/Camera\_DisplayServer.pdf</a> and <a href="http://www.thinmanager.com/TechNotes4/04\_Configuration/Camera\_DisplayClient.pdf">http://www.thinmanager.com/TechNotes4/04\_Configuration/Camera\_DisplayClient.pdf</a>.

### **IP** Camera Configuration

Before a camera can be added to a Display Client, the camera itself must be configured. The camera configuration wizard can be launched by right clicking on the **Cameras** branch of the ThinManager tree and selecting the **Add Camera** option.

Camera Branch of ThinManager Tree

Automation Control Products <u>www.thinmanager.com</u> Revised 12/23/2009

# **IP Camera Display Server Configuration Wizard**

🗷 Camera Configuration Wizard	×
Camera Name Enter the camera name and network location	$\sim$
Camera Name and Group Camera Name Cam1 Change Group	
Camera Model Make generic Model generic	
Camera Network Setup         99         98         97         207           IP Address         80         <	
< <u>B</u> ack <u>N</u> ext > Finish Cancel Help	

Camera Configuration Wizard

The first page of the camera configuration wizard requires that a camera name be entered. Select the make and model of the camera you are configuring and the IP address and Port that has been previously assigned to the camera. The IP address and port are set by using the camera manufacturers configuration software or through the use of the camera's web browser interface.

🙁 Camera Configuration Wizard			×
Camera Authentication Enter the camera username an	d password		lpha

Password			]
Verify Password			]
< <u>B</u> ack <u>N</u> ext >	Finish	Cancel	Help

Camera Authentication

On the next page of the camera configuration wizard, the user authentication information can be entered. If your camera requires authentication enter it on this page. If the camera has been configured to allow anonymous connections, leave the information blank. The terminal uses the authentication information when connecting to the camera. Authentication information is setup in the camera by using the camera manufacturers configuration software or through the use of the camera's web browser interface.

Overlay Options		X
General Options Enable Overlay Interactive Scale Crop Show Complete O Border Size	Camera Name edium	OK Cancel
Title Options	-	
Title Position	l op Normal	<u> </u>
Enable Cycling		
Cycle Time (secs)	0	

**Overlay Options** 

Clicking the **Overlay Options** button will allow the setting of additional overlay options.

#### **General Options:**

• **Enable Overlay** – This option allows the overlay to be started in a disabled non-visible state. The TermMon ActiveX Control can be used by an application to enable the overlay.

- Interactive This option allows the user on the terminal to interact with the overlay. If the user clicks in the overlay area, he can perform functions such as switching cameras and making the overlay full screen.
- Scale This option will scale camera frames to be to the size of the overlay window. Aspect ratio will be maintained.
- **Crop** This option will crop the camera frame if it is larger than the camera overlay. This option when combined with the **Scale** option will always fill the entire overlay area.
- Show Complete Camera Name Using this option allows the entire path of the camera to be displayed. The path includes any groups of which the camera is a member.
- Border Size This setting determines the size of the overlay outside border.

**Title Options:** 

- Title Position This is the position of the camera name within the overlay.
- **Title Size** This is the size of the camera name when displayed within the overlay. Set this to *Don't' Show Title* if you do not want the camera name displayed.

**Cycling Options:** 

- Enable Cycling Check this setting to cycle between the cameras assigned to the overly.
- **Cycle Time** This is the time in seconds that the overlay will display each camera before switching to the next camera.
