

## Terminal Server Schedules

Use the **F1** button on any page of a ThinManager wizard to launch Help for that page.

Visit [www.thinmanager.com/TechNotes4/01\\_Intro/Manuals.shtml](http://www.thinmanager.com/TechNotes4/01_Intro/Manuals.shtml) to download the manual, manual chapters, or the abridged ThinManual.

The **Terminal Server Name** page of the Terminal Server Wizard has a **Schedule** button to configure a schedule for terminal server events.

*Terminal Server Wizard – Terminal Server Name Page*

Select the **Schedule** button on the **Terminal Server Name** page of the Terminal Server Wizard to launch the **Event Schedule** window.

*Event Schedule*

The **Event Schedule** will list events for the terminal or group. It has four buttons.

- The **Add** button will launch a **Schedule** window to allow an event to be configured.
- The **Edit** button will allow a highlighted event to be changed.
- The **Delete** button will remove a highlighted event.
- The **OK** button will accept changes and close the **Event Schedule** window.

Events can be added by selecting the **Add** button to launch the **Schedule** window.

Schedule Window

The **Schedule** window has several configuration settings.

**Event Type** is a drop-down box that allows event selection:

- **Disable Terminal Server** - This will disconnect all the ThinManager Ready thin clients connected to the terminal server. The sessions will remain idle on the terminal server unless they are set to disconnect in the Terminal Services Configuration console.
- **Enable Terminal Server** - This will allow a disabled terminal server to accept ThinManager Ready thin client connections again.
- **Reboot Terminal Server** - This will cycle power on the terminal server and restart it.

The **Repeat Interval** radio buttons allow the event in the **Event Type** drop-down to be run **Once Only**, **Weekly/Daily**, **Monthly**, or **Yearly**.

- Selecting **Once Only** will show a **Select Date** field for the event.
- Selecting **Weekly/Daily** will show a **Weekly Schedule** list for the event to run. The **Every Day** button will select all the days in the list.
- Selecting **Monthly** will show a **Select Day of Month** field for the event.
- Selecting **Yearly** will show a **Select Date** field for the event.

The **Time** field allows the selection of the time that the event should occur.

Select the **OK** button to close the **Schedule** window.

Select **Add** to add another event to the **Event Schedule** or select **OK** to close the **Event Schedule** window and return to the terminal server configuration.
