

XLi Exclusives

From ACP ThinManager

Run the mobile ThinManager app now and be ready to run your new tablet as a thin client when ThinManager 6.0 is released in April!

Dear Channel Partner,

ACP has come up with a couple of special offers for our sales channels to spur interest and sales of ThinManager.

The first offer is a Mobile Manager 5-pack that consists of a 5-pack of ThinManager XLi combined with a mobile management tablet, an industrial grade case for protection and 1 year of ThinManager Comprehensive Support. This offer will allow any customer wishing to get a mobile management tablet the ability to purchase it as part of a ThinManager XLi Mobile Manager package.

The second offer is ThinManager Server XLi with a 10-pack of the TermTek office thin client at no additional charge. The price for Server XLi is list price but the additional hardware, in essence, creates a \$2,000.00 discount for the customer (based on the \$198.00 TermTek).

These offers are based on limited quantities of hardware. Orders are filled on a first-come, first-served basis. Offers not valid past June 30, 2012.
