## ThinManager License Activation Without Internet Access

---

Use the **F1** button on any page of a ThinManager wizard to launch Help for that page.

Visit [www.thinmanager.com/TechNotes/Intro/Manuals.shtml](http://www.thinmanager.com/TechNotes/Intro/Manuals.shtml) to download the full Manual or the ThinManual.

---

ThinManager licenses are activated on the ACP License Site ([https://secure.randombytes.com/TM\\_License/](https://secure.randombytes.com/TM_License/)) through the Internet.

If the computer that ThinManager is installed on lacks Internet access, the licenses can be activated on a computer that has does have Internet access and then the license can be transferred to the ThinManager Server.

### Activation Steps:

1. Write down the Install ID of the computer that will be the ThinManager Ser.  
This is found on the Licensing Window by selecting Install>License on the ThinManager menu.
2. Write down the license number to be activated.  
This is usually found inside the ThinManager CD case.
3. Go to a computer with Internet access.
4. Go to the ACP License Site ([https://secure.randombytes.com/TM\\_License/](https://secure.randombytes.com/TM_License/)).
5. Login or create a user account and login.
6. Select the Activate License link.
7. Enter the License Number and Install ID from step 1 and step 2.
8. Save the license to a convenient place.
9. Transfer the license to the ThinManager Server, using a USB drive, floppy, burned CD, or over the network.
