

Trialware of ThinManager

Use the **F1** button on any page of a ThinManager wizard to launch Help for that page.

Visit www.thinmanager.com/technotes/ to download the manual, manual chapters, or the ThinManual.

If you want to download ThinManager as a trial here are simplified steps. Details of these steps are found in Tech Notes on the Tech Note page at <http://www.thinmanager.com/technotes/index.php>.

The ThinManual at http://www.thinmanager.com/technotes/01_Intro/ThinManual.pdf is a good concise reference.

- 1) Download ThinManager from our Downloads page at <http://www.thinmanager.com/support/downloads.php>.
- 2) Install it on a PC, preferably a server.
- 3) Request a Demo code from <http://www.thinmanager.com/licensing/index.php> to get 30 days of licenses.
- 4) Configure your ThinManager.
 - a. Define a terminal server as a Display Server.
 - b. Deploy an application as a Display Client.
 - c. Create and configure your terminal to use the display client.
- 5) Boot your thin client and select your configuration.

If you have a ThinManager Ready thin client you can set a static IP address to point to ThinManager.

If you have a ThinManager Capable thin client you will need to enable the PXE Server within ThinManager.

If you don't have thin client hardware you can install the WinTMC client on a PC and use it to connect to ThinManager.
